Come and see how we
can make a difference

Cultivating Excellence is founded on the following Bible verse Proverbs 22:6 – “start children off on the way they should go and even when they are old, they will not turn from it.”
We aim to achieve excellence in education enriched by a sound holistic environment.

What does this all mean?

Our experience has shown us that the traditional method of teaching and school as we know it is becoming obsolete. We believe that schooling is not merely about passing your grade but to develop a clear understanding of what you have learnt and more importantly to be able to apply this.

It is for this very reason that we have decided to follow amongst others, the British curriculum as this philosophy of education not only provides students with knowledge and skills but encourages them to apply this to the real world.

Children ought to have a proper perspective on the value of education. Awareness of values and principles are as important as academics in developing a child holistically.

Our offering:

- Small classes – online and face to face
- Qualified and experienced tutors
- Flexible curriculum
- Curriculum designed for each individual student
- Accelerated learning techniques and study skills
- For students falling behind in their core skills, we offer specialised remedial teaching
- Critical, independent thinking
- Physical and creative activities
